Doctor's Choice

**Dear Friends, Investors, Stakeholders and Moringa Tree lovers:**

Our newsletter will now be branded as “Seeds” for the numerous metaphorical meanings the word lends to the work that we do. I do hope you like it and that you will enjoy news from “Seeds” monthly as we pull through what has been a difficult time for all.

These briefs will be short with links of interest in the side column that will take readers to our newly launched website and other destinations of interest.

The top of the list for this edition is the launch of our new “Moringa 4 Kids” program (M4K). Read more in our latest Press Release. This is a major expansion of the program that began 4+ years ago when we first began to manufacture Moringa Leaf Powder. We had more powder than we had customers at that time so it was decided that we would donate the powder to schools in our local district for their in-school meal programs for the children.

The impacts on the physical and cognitive health of the students are impressive and we received support from a benefactor to continue the program. Our growing production capacity and increased financial support now makes it possible to take a huge step forward and make M4K available to, eventually, kids throughout East Africa.

This year we’re partnering with Doctor’s Choice—Uganda, our client and moringa customer. Doctors Choice focuses on African solutions to African problems. They produce a full suite of nutritional products from natural ingredients and formulas based on decades of research that are distributed locally and internationally. And they will be helping us to expand the distribution and reach of the M4K program

It’s an exciting program and you’ll be hearing more about it soon.

Thank you for your time and interest. Please feel free to pass along this edition of seeds to your friends and associates.

Sincere Regards,  
Kim Elton, Co-founder  
Ventree Innovations Inc.
